Hello M O J O,

I feel sorry for my delayed response due to an unexpected broken issue of newsgroup system. In the meantime, I notice that you once posted the same question at

<http://msdn.microsoft.com/newsgroups/managed/default.aspx?dg=microsoft.public.dotnet.framework.interop&tid=3bc0b33f-daac-40f1-9c85-934a508e7182&m=1&p=1>
<http://msdn.microsoft.com/newsgroups/managed/default.aspx?dg=microsoft.public.dotnet.framework.interop&mid=614df44a-8e97-4b17-8d17-95a9f848bb11&sloc=en-us>

But we did not capture them in time. My guess is that your Managed Newsgroup account did not take effect at the time, and we failed to get them. We feel sorry for the inconveniences.

From this post, my understanding on this issue is: you want to know how to get the global id of a mail item. If I'm off base, please feel free to let me know.

I think the 'GlobalObjectID' in your question might refers to the property 'EntryId'. When a mail item is stored in a folder of exchange server, it will have a unique ID. But when the mail item is moved to another folder, it ID may be changed. Therefore, when you are sending an email, it will have an ID when it is in Drafts folder (not sent out yet), but when it sent out and moved into Sent folder, it will have another EntryID.

If you have any other concern or need anything else, please feel free to let me know.

Sincerely,
Jialiang Ge (jalge@xxxxxxxxxxxxxxxxxxxxxxxx, remove 'online.')

RE: Repost: Outlook 2007: How do I find GlobalObjectID?

Get notification to my posts through email? Please refer to <http://msdn.microsoft.com/subscriptions/managednewsgroups/default.aspx#notifications>. If you are using Outlook Express/Windows Mail, please make sure you clear the check box "Tools/Options/Read: Get 300 headers at a time" to see your reply promptly.

Note: The MSDN Managed Newsgroup support offering is for non-urgent issues where an initial response from the community or a Microsoft Support Engineer within 1 business day is acceptable. Please note that each follow up response may take approximately 2 business days as the support professional working with you may need further investigation to reach the most efficient resolution. The offering is not appropriate for situations that require urgent, real-time or phone-based interactions or complex project analysis and dump analysis issues. Issues of this nature are best handled working with a dedicated Microsoft Support Engineer by contacting Microsoft Customer Support Services (CSS) at <http://msdn.microsoft.com/subscriptions/support/default.aspx>.
