- 

Hi all,

I have made many install builds of this particular application in VS.Net 2003 and the installation and uninstaltion used to work fine.

All of a sudden uninstallation of my application hangs in middle. I have checked the Event Log also but there is no entry made in the same.

If I try to install the application again on the system, it shows the Message the product is already installed on the machine, Uninstall the same. My Installed application stops working also.

The MSI log follows.

Thanks in advance,  
Puneet Gupta
