Hi All:

I have a webpage which is using JavaScript calling webservice from client side for getting UnitPrice from database when product configuration is changed by the user. Sometimes i was getting the error say 'Server was unable to process request. --> The root element is missing.'

Does somebody can help me out? Your help is greate appreciate.

I could not found any solution for this error by searching through the internet.

My page got this error is : http://www.builddirect.com/ProductDisplay_680_6950_0.aspx

Regards

Ping
