I have a 2.0 web service. When I do a direct copy solution folder to a different machine the web service works. I have created a web deployment project and web setup project in VS 2005 to create a msi. When I install web service through msi I get the below error

Binary format of the specified custom attribute was invalid.
Description: An unhandled exception occurred during the execution of the current web request. Please review the stack trace for more information about the error and where it originated in the code.
What am I missing when installing through msi?

Exception Details: System.Reflection.CustomAttributeFormatException: Binary format of the specified custom attribute was invalid.

Stack Trace:

[CustomAttributeFormatException: Binary format of the specified custom attribute was invalid.]

System.Reflection.CustomAttribute._CreateCaObject(Void* pModule, Void* pCtor, Byte** ppBlob, Byte* pEndBlob, Int32* pcNamedArgs) +0
System.Reflection.CustomAttribute.CreateCaObject(Module module, RuntimeMethodHandle ctor, IntPtr& blob, IntPtr blobEnd, Int32& namedArgs) +104

System.Reflection.CustomAttribute.GetCustomAttributes(Module decoratedModule, Int32 decoratedMetadataToken, Int32 pcaCount, RuntimeType attributeFilterType, Boolean mustBeInheritable, IList derivedAttributes) +482

System.Reflection.CustomAttribute.GetCustomAttributes(RuntimeFieldInfo field, RuntimeType caType) +72

System.Reflection.RuntimeFieldInfo.GetCustomAttributes(Boolean inherit) +33

System.Xml.Serialization.XmlAttributes..ctor(ICustomAttributeProvider provider) +207

System.Xml.Serialization.XmlReflectionImporter.ImportStructLikeMapping(StructModel

2.0 web service msi

model, String ns, Boolean openModel, XmlAttributes a) +1752

System.Xml.Serialization.XmlReflectionImporter.ImportTypeMapping(TypeModel
model, String ns, ImportContext context, String dataType, XmlAttributes
a, Boolean repeats, Boolean openModel) +638

thanks for the help
