Hi Roy,

"Please note the error is in the call of EnableVisualStyle, not later when the form is displayed. "

If I understand correctly, you mean you got this message when calling the EnableVisualStyle method, is it from an exception?

If yes, maybe we can get some information from the stack trace of the exception.

If there is not much helpful information, is it possible to send me a sample to let me test it on my system?

Thanks!

Best regards,

Ying-Shen Yu [MSFT]
