The program worked for 3 compiles and then after the 4th compile it failed again.

The exception is DLL not found

Here is the stack trace.

```
system.windows.forms.dll!System.Windows.Forms.OSFeature.GetVersionPresent(System.Object
feature = {System.Object}) + 0x10b bytes
system.windows.forms.dll!System.Windows.Forms.FeatureSupport.IsPresent(System.Object feature =
{System.Object}, System.Version
minimumVersion = {System.Version}) + 0x13 bytes
system.windows.forms.dll!System.Windows.Forms.FeatureSupport.IsPresent(System.Object feature =
{System.Object}) + 0x32 bytes
system.windows.forms.dll!EnableThemingInScope.EnableThemingInScope(bool enable = true) + 0x3f
bytes
system.windows.forms.dll!ThreadContext.RunMessageLoop(int reason = 0x2,
System.Windows.Forms.ApplicationContext context =
<undefined value>) + 0x3e bytes
system.windows.forms.dll!System.Windows.Forms.Application.DoEvents() + 0x1a bytes
> HGSCfgUtility.exe!KMS.HGS.Forms.ConfigUtility.ConfigUtility.Main(string[] args = {Length=0x0})
Line 1116 C#
```

The test program is still working, but I have not recompiled it.
