You are using VS 2003. This is just one of the many problems with this IDE. There is a newsgroup dedicated to the IDE and this is a common problem. The fact that MS does not see fit to update the IDE but make it's customers wait for the next release is turning me against them. I have had to reinstall the IDE 4 times to get it back to running.

Perhaps if all developers who have problems with the IDE were to post in the IDE newsgroup they might do something.

microsoft.public.vsnet.ide
