✘ Of course I did! ;-)

✘

✘ I solve my problem using impersonation in web.config like this...

✘

✘ <identity impersonate="true" userName="stephane" password="12345"/>

✘

✘ I guess this is not te best way, but at least it's working on my development

✘ server.

✘

✘ Thanks,

✘

✘ Steph

That's interesting. You weren't using Anonymous authentication w/impersonation when it wasn't working were you?
