Hi,

When I tried to run a web project on the browser using localhost I always get this message:

Configuration Error

Description: An error occurred during the processing of a configuration file required to service this request. Please review the specific error details below and modify your configuration file appropriately.

Parser Error Message: Execution permission cannot be acquired.

Source Error:

Version Information: Microsoft .NET Framework Version:1.1.4322.2032; ASP.NET
Version:1.1.4322.2032

I'm not using Using Visual J# so I don't know why I'm getting this error.

Do I need to reinstall Framework? Any Ideas?
