I use this to know if a program is running; until now all ok but on a pc

the

procedure return this error :

```

Re: Help on "GetProcessesByName(String processName)"

machineName)

```
at System.Diagnostics.Process.GetProcessesByName(String processName,  
String machineName)
```

```
at System.Diagnostics.Process.GetProcessesByName(String processName)  
at GModDoc.Connect.InizializzaMonitor()
```

Does any one know why?

Thank's for help
