Hi Adri,

Can you try to run this app again if you have another machine that have NET framework installed? If it works fine on that machine, please re-install .NET framework on you machine. Is the version of .NET framework you've developed on the same to the one it is running on?

If that still doesn't help, could you please send me a copy of your app by email? Remove 'online' from the nospam alias is my real email? I'll check it ASAP. Thank you!
