I am working on a VB6 desktop ap. I would like to talk the boss into converting to dot net sooner rather than later. What are some good reasons I can tell him to get him to convert as soon as possible?

Well, the first question to ask yourself is: why would you like to talk the boss into converting to .NET sooner rather than later? You must have a reason yourself – why not explain that to us first, and we may be able to help to strengthen the case.
