I have installed MSDE but when ever i try to connect to it from the same computer, it gives me 'Can not open Database requested in Login 'pubs' failed. Login fails'

I tried everything nothing seem to work plz help

my connection string is as follows

Public Conn As New ADODB.Connection

```
conn.Open("Driver={SQL Server};User ID=sa;Password=ab;Database=BigSQL;Server=Master\Mycube")
```

where 'Master' is the computer name and 'Mycube' is the insance name

Also If the computer is password protected, could that create the problem ?

Thanks

Bobby
