Set up your own CA, and issue yourself a certificate?

<http://support.microsoft.com/?id=299525>

HOWTO: Set Up SSL Using IIS 5.0 and Certificate Server 2.0

<http://support.microsoft.com/?id=218445>

How to Configure Certificate Server for Use with SSL on IIS (IIS v4.0 and NT)

If you are using IIS 6.0, then you can use the tools in the Res Kit:

: Hello,

:

: I already have setup SSL on my production server via purchasing a  
: certificate and that seems to work fine as I can type in https:// and it  
: works fine.

:

: However, I want AND need to be able to test my .ASPX webpages via SSL on  
my  
: local server.

:

: What is the best way to this?

:

: Thanks.
