I have a c# web app that use's CrystalReportViewer, it works great when I run the app locally, but when I build it and copy it to our web server I get the following error.

Configuration Error

Description: An error occurred during the processing of a configuration file required to service this request. Please review the specific error details below and modify your configuration file appropriately.

Parser Error Message: File or assembly name CrystalDecisions.Shared, or one of its dependencies, was not found.
