Search for that CLSID in the registry and see which DLL it's pointing to – maybe you haven't packaged all dependencies? If it's a COM interop object then have you asked it to be 'copied locally' for your project thus ensuring it gets packaged?

Chris.

I copied the CLSID incorrectly – it should be:

00000602-0000-0010-8000-00AA006D2EAA

Sorry about that.

Wayne
