Hi Windy,

There are a couple of articles and an example of how to do this on MSDN.

Take a look at ".NET Framework 1.1 Deployment Guide" at

http://msdn.microsoft.com/library/default.asp?url=/library/en-us/dnnetdep/html/dotnetframedepguid1_1.asp?frame=tru

and the Setup.exe Bootstrapper Sample that is available at

<http://www.microsoft.com/downloads/details.aspx?FamilyId=66350891-D15B-446B-BD69-F7F849224A00&displa>

Regards,
