I think you posted this in the wrong newsgroup. This is for Microsoft .Net Programming questions.

Robin S.

Please direct me to information on S&T download to a PDA.  
Will 2007 let you down load a bigger Map size to fill a 1 or 2 gig  
compact  
flash card.  
Even last year MS autoroute europe limited the map size.  
Or is there a work around.

Just want to use the PDA for 8 hr driving trips.
