Hi All,

I have the following code in C#:

```
ISelectedFilter = 1;  
this.tabFilters.SelectedIndex = (ISelectedFilter == 0 ? 0  
: ISelectedFilter - 1);
```

After executing the above statements, `this.tabFilters.SelectedIndex` is changed to `-1`. Why? I expected it to be `0`. Anyone can explain it to me?

Thanks!

-Emily
