Thanks for your reply,

Since you've ensured that the "\r\n" linefeed are part of the string during debugging, I think the mail message should also contain the characters. Is your email format set to html? If so, I suggest you try using "<br/>" instead of "\r\n" to create new line since HTML does not recognize "\r\n" as line feed, but use "<br/>" for insert new line.

Sincerely,

Steven Cheng
