Hi John,

When I have an editable combobox in a DataGridView and the user tries to correct an error they can not move the cursor from character to character with the arrow keys.

Firstly, it seems that you are not using the standard DataGridViewComboBoxColumn in the DataGridView, because the cells under the DataGridViewComboBoxColumn are not editable.

Secondly, when the user tries to move the input cursor within the cell with the arrow keys, is the cell in edit mode? If the cell is in edit mode, the user should be able to move the input cursor within the cell with the arrow keys.

To solve the problem more quickly, could you please send me a sample project that could just reproduce the problem? To get my actual email address, remove 'online' from my displayed email address.

Thank you for your cooperation and I look forward to your reply.

Sincerely,  
Linda Liu

RE: DataGridView editable combobox Left Right Arrow keys

Note: The MSDN Managed Newsgroup support offering is for non-urgent issues where an initial response from the community or a Microsoft Support Engineer within 1 business day is acceptable. Please note that each follow up response may take approximately 2 business days as the support professional working with you may need further investigation to reach the most efficient resolution. The offering is not appropriate for situations that require urgent, real-time or phone-based interactions or complex project analysis and dump analysis issues. Issues of this nature are best handled working with a dedicated Microsoft Support Engineer by contacting Microsoft Customer Support Services (CSS) at <http://msdn.microsoft.com/subscriptions/support/default.aspx>.
