In article <OmRvd33#DHA.620@TK2MSFTNGP11.phx.gbl>, "Ollie" <why do they need this!!!!> says...

- > *The problem is I want to deny all permissions and then be able to evaluate*
- > *an assembly and generate a list of permissions it requires and then apply*
- > *those permissions explicitly.*

I don't of any automatic way of doing that. Would be pretty cool though! :)
