Hi,

I get following error when creating an ASP.NET project :  
named "<http://localhost/WebApplication1>"

—> ERROR : "URL:'<http://localhost/WebApplication1>', 'HTTP/1.0 503 Service Unavailable"

No error though when I create like this :

<http://127.0.0.1/WebApplication1>

I checked the file 'C:\WINNT\system32\drivers\etc\hosts'  
where there is an entry 127.0.0.1 localhost  
So, that seems to be OK.

so, what can it be ?

any help greatly appreciated

Chris
