Yes – they all have different purposes though. What is appropriate for one group often isn't appropriate for other groups though. That doesn't sound like that's the case here. Could you give an example of something which wouldn't be appropriate to post on this group but would be appropriate to post on your group, or vice versa?

So at some point in the future there *might* be user events, and until then there's nothing to distinguish it from this group? Sorry, I still don't see why it's a good thing.
