Hi,

My situation is I already set the `TreeView.CheckBoxes` property. But in this treeview I don't want to show all items have checkboxes, but some of them I want to show text and icon or text only. For example:

Office as folder

Under this "Office" folder, there are items have checkboxes.

So I want to set the `TreeNode.ShowCheckBox = false` for this "Office" folder.

"Marc Gravell" <marc.gravell@xxxxxxxxx> wrote in message news:1155876757.029790.325110@xx

Because it doesn't exist?

There is a `TreeView.CheckBoxes` property (bool) if that helps any?

Marc
