Use this (it's VB.NET so you'll need to translate it):

<http://groups.google.com/group/microsoft.public.dotnet.framework.windowsforms/msg/0a0b6b7c0571018c?hl=en>

Hi,
My situation is I already set the `TreeView.CheckBoxes` property.
But in this treeview I don't want to show all items have checkboxes, but
some of them I want to show text and icon or text only.
For example:

Office as folder
Under this "Office" folder, there are items have checkboxes.

So I want to set the `TreeNode.ShowCheckBox = false` for this "Office"
folder.

Because it doesn't exist?

There is a `TreeView.CheckBoxes` property (bool) if that helps any?

Marc
