I need to get data from a sql server database and insert records into a
sqlce
database if they do not already exist in the sqlce database. I have
written
the code below but I'm getting an error message when the cmd.Prepare()
line
is executed. The error message is – "The conversion is not supported. [
Type
to convert from (if known) = int, Type to convert to (if known) =
uniqueidentifier]"}

I have compared the ordinal position of each parameter to the SqlDbTypeType
and
they all match. I don't have any idea why I'm getting the error message
or
how to debug it at this point. Any help would be much appreciated.

```
cmd.CommandText =  
"Insert VMI_CUST (CUST_ID, SHIP2_ID, CUST_NO,  
QUICK_SCAN, ALLOW_DUPLICATE_SCANS,  
SIGNATURE_REQUIRED, " +  
"VALIDATE_MANDATORY_ITEMS, PO_TYPE, CUST_PO,  
LAST_CHANGE_DATE, RELEASE_NO, LAST_SYNC_DATE,  
COMPANY_ID) " +  
"Select " +  
"? , ? , ? , ? , ? , ? , ? , ? , ? , ? , ? , " +  
"" + Global.CompanyID + "" " +  
"FROM vmi_controls " +  
"WHERE vmi_controls.company_id = "" +  
Global.CompanyID + """; //+  
" AND NOT EXISTS " +  
"(SELECT cust_id FROM vmi_cust  
WHERE  
cust_id = "" + drCustomers[x]["CUST_ID"] + "" " +  
" and ship2_id =  
"" + drCustomers[x]["SHIP2_ID"] + "" " +  
" and company_id  
=  
"" + Global.CompanyID + "");
```

```
cmd.Parameters.Clear();
```

```
cmd.Parameters.Add(new SqlParameter("CUST_ID",
```

Re: Problem using command.parameters

```
SqlDbType.UniqueIdentifier));  
cmd.Parameters.Add(new SqlParameter("SHIP2_ID",  
SqlDbType.UniqueIdentifier));  
cmd.Parameters.Add(new SqlParameter("CUST_NO",  
SqlDbType.NVarChar));  
cmd.Parameters.Add(new SqlParameter("QUICK_SCAN",  
SqlDbType.NVarChar));  
cmd.Parameters.Add(new  
SqlParameter("ALLOW_DUPLICATE_SCANS",  
SqlDbType.NVarChar));  
cmd.Parameters.Add(new  
SqlParameter("SIGNATURE_REQUIRED", SqlDbType.NVarChar));  
cmd.Parameters.Add(new  
SqlParameter("VALIDATE_MANDATORY_ITEMS",  
SqlDbType.NVarChar));  
cmd.Parameters.Add(new SqlParameter("PO_TYPE",  
SqlDbType.NVarChar));  
cmd.Parameters.Add(new SqlParameter("CUST_PO",  
SqlDbType.NVarChar));  
cmd.Parameters.Add(new  
SqlParameter("LAST_CHANGE_DATE", SqlDbType.DateTime));  
cmd.Parameters.Add(new SqlParameter("RELEASE_NO",  
SqlDbType.NVarChar));  
cmd.Parameters.Add(new  
SqlParameter("LAST_SYNC_DATE", SqlDbType.DateTime));  
  
cmd.Prepare();
```
