NeverMind..i got it working sorry and thanks

Please stop posting questions without also posting an answer.

It's great that you are able to solve the problem yourself, but it's customary and polite to include the answer if you follow up your own post to inform us that you've solved it. This newsgroup isn't just here for you to have your questions answered; we do this in public so other can benefit from the questions asked and answered as well.

Pete
