- 

Folks,

We *\*really\** need to get a handle on how to eliminate the SPAM posts making their way into this group and related group like ASP.NET. It has gotten to the point where it just isn't any fun anymore, having to wade through this crap to post a question or to help somebody.

If somebody doesn't come up with a good idea or take the bull by the horns and get control over this stuff fast, I am gonna simply go somewhere else.

Thanks.

— Peter
