Hi Steven,

Yup, I have seen that KBA before. I agree that it should be easier to convert vbscript to VB.Net but since I am learning C# so I thought of doing it in C#. Anyway, I have get it working.

Thanks,  
Alex

Hi Alex,

As for cleaning sidhistory, so far what I found is the following kb article which provide the vbscript for cleaning sidhistory:

#How To Use Visual Basic Script to Clear SidHistory  
<http://support.microsoft.com/?id=295758>

have you tried using VB.NET code which maybe easy to convert from vb. Or you can consider keep the vbs script and use C# to programmatically invoke cmd to execute the vbscript.

Sincerely,

Steven Cheng

Hi All,

Have anyone tried to remove sidHistory using C#?

I keep getting the following error when I use the PutEx method.

```
System.Runtime.InteropServices.COMException was unhandled
Message="Unspecified error\r\n"
Source="Active Directory"
ErrorCode=-2147467259
StackTrace:
at ActiveDs.IADs.PutEx(Int32 lnControlCode, String bstrName, Object
vProp)
```

Thanks,  
Alex
