Hai all,

I have this problem with MS Chart. First of all I would like to show how I code it:

```
Dim Stud(,) As Object = New Object(,) _  
{ {"Student", "Final Mark Percentage"}, _  
  {"9 - 10 AM", 10}, _  
  {"10 - 11 AM", 10}, _  
  {"11 - 12 AM", 10}, _  
  {"12 - 1 PM", 10}, _  
  {"1 - 2 PM", 10}, _  
  {"2 - 3 PM", 10}, _  
  {"3 - 4 PM", 10}, _  
  {"4 - 5 PM", 10}}
```

What I want to ask are:

How to set the value dynamicaly? like for example using for loop. As we can see above code that I add the value to the object is fixed.

Thanks all

.
