Hi

Thanks for your feedback.

As I posted before, this is the outlook email security feature to prevent from virus to automatically send email.

Note Because of the Outlook E-Mail Security Update, when you run the following procedures, you will be prompted several times for permission to access your e-mail addresses and one prompt to send your message (see the following screen shots). This is expected behavior.

For more information, see Security Features for Outlook 2002 and Previous Versions.

http://msdn.microsoft.com/library/default.asp?url=/library/en-us/dno2k3ta/html/odc_ac_olauto.asp

It is hard to disable the windows, because it is on the server side. You may take a look at the link below.

Administrator information about E-mail security features
<http://support.microsoft.com/?id=290499>

If you still have any concern, please feel free to post here.

Best regards,

Peter Huang
