

Re: Killing VB softly with his song, Killing VB softly...with a song.....

aspirations I hold in the practice of architecture where I was formally educated, trained, and where much of my thinking processes have been influenced by an immersion into classical thought and philosophy.

Regardless, that does not change the fundamental premise of my contentious postulation, that being, in the course of time the VB syntax and grammar [4] will continue to be killed softly by this song.

It is interesting to note the wikipedia disclaimer for those recoding the history of Visual Basic [3]. That there are contentious and biased points of view we all hold is of no question none of which however change the facts. I like VB myself but one day I had the "learn three for the price of one" epiphany and realized I was compelled to think pragmatically and was therefore compelled to adopt the legacy provided to us by men such as Thompson,Ritchie and Eich.

That's all there is to it for me as a person who happens to have what some may call a deep insight if you will as I am rarely incorrect in my prognostications. People that know me over a period of time have told me for years I would do much better in the stock market and financial management because I have an uncanny ability to see a trend early in the curve and call which horse will win the race. But alas, I am a stubborn fool.

It is only because I am also a maverick that I have avoided that pursuit in favor of my current endeavors which compel me to say "sorry fellas" because it really looks like the VB syntax and grammar has seen its heyday [5], Microsoft's efforts to retain the loyalty of VB developers notwithstanding, the VB syntax and grammar is in the process of becoming relegated to the annals of history to take its place as second fiddle in this symphony of the web where I find myself lucky enough to have found a seat in the orchestra which I credit to my willingness to learn, my predilection towards change, and my ability to read the sheet music which the conductor has made clear: This symphony is to be played in the key of the legacy of C.
