Mark,

Sorry I did more look at what you wrote than to the problem (That is as soon as I see methods as "loadDataTable" I stop reading because than I can not see what is behind that. (I could have guessed that simple one, however I did not).

You can even do

```
\\
dim ds2 as New dataset
ds2.tables.add(dtBordDates.Copy)
///
```

Have a look as well to that assignment of the datatable, often samples are translated C# samples and therefore the longer needed C# code is used.

Sorry that I did not see it direct.

I hope this helps anyhow

Cor

.
