hi all

i have 2 forms (say A & B). form A has an open dialog box. plz tell me how to capture the whole path of the selected file into a string. Also, i need to use that string in form B. so how to retain the value of that string in form B.

also, how to get the complete path of the file from Save As dialog box.

also, how to print a string(not an array) char by char.

plz reply.....
