That was an example, not the exact code for you to use. Change it to match your case.

Robin S.

Hi Robin,

Thanks for the reply. I've inserted your code but I'm getting the following error messages on the dim statements:

Type 'CustomersDataSet' is not defined
Type 'CustomersTableAdapter' is not defined

I have statements "Imports System.Data" and "Imports System.Data.SqlClient" in the module in case its relevant.

Any ideas?
Randy
