Hi Jonathan –

Have you tried rounding to the nearest tenth and subtracting one hundredth?

```
Dim myVal As Double
myVal = 41.87
myVal = Math.Round(myVal, 1) - 0.01
Debug.WriteLine(myVal) 'Returns 41.89
```

```
myVal = 41.84
myVal = Math.Round(myVal, 1) - 0.01
Debug.WriteLine(myVal) 'Returns 41.79
```

....sometimes the simplest approaches work the best.

Happy Coding,

–Mark
