I use:

```
char szLang[32];
char szCountry[32];
char szCodePage[32];

if (GetLocaleInfo(LOCALE_USER_DEFAULT, LOCALE_SENGLANGUAGE,
    szLang, sizeof(szLang)) > 0)
{
    if (GetLocaleInfo(LOCALE_USER_DEFAULT, LOCALE_SENGCOUNTRY,
        szCountry, sizeof(szCountry)) > 0)
    {
        if (GetLocaleInfo(LOCALE_USER_DEFAULT, LOCALE_IDEFAULTANSICODEPAGE,
            szCodePage, sizeof(szCodePage)) > 0)
        {
            CString loc;
            loc.Format("%s_%s.%s", szLang, szCountry, szCodePage);
            setlocale(LC_ALL, loc);
        }
    }
}
```

Ferdinand.
