I am migrating C++ unmanaged to managed VC 7.1. I continue to have problems with try catch blocks through-out my code. The compile tells me the the code is unreachable C2407 at the catch portion of the block. I am using /clr /EHsc switches. The class does not have the prefix "public _gc class CAccountExposure : System::Windows::Forms::Form " but "class CAccountExposure : public CDialog." The following is a snippet of code representing the problem:

```
try
{
    statements that automate excel
}
catch(COleException *e)
{
    char buf[500];
    sprintf(buf, "COleException. SCode: %60x. ", (long)e->m_sc);
    ::MessageBox(NULL, buf, "COleException", MB_SETFOREGROUND | MB_OK);
}
```
