Daniel,

You may have started it in the subthread, but you definitely didn't start it. In earlier antagonistic posts in this thread by some of the users that you mentioned, our product was referred to as "crap", "a\$\$ bandit", "twat", etc.

We were also told many times to "shut the f*ck up!"

All MVPs were also referred to as "hackers" among other things.

You certainly didn't start the name calling and I'm sorry that you felt that it was necessary to respond on the same level.

Jonathan
