Jochen,

You appear to be having a dialogue with yourself. I did not say I cannot reproduce the problem. You read your own post and thought I had replied. :-)

Actually, I don't need to reproduce the problem because it is **ALWAYS** there, i.e. the **back** and **forward** buttons are GRAYED OUT and cannot be used!!!! :-)

There is nothing for me to prove, disprove or reproduce. The problem is with Microsoft's buggy Document Explorer.

BTW: When I use CAPS, it's for emphasis. I am not shouting. :-)

Do I understand correctly that you do not see this problem when you use the document explorer?

If you respond yes, then there must be a gremlin in my system.... :-)
