[Announce] Dear microsoft.public.dotnet.xml,

Stylus Studio has published a new educational video tutorial entitled:  
Visual Data Integration Using Stylus Studio XML Pipeline.

To view this new tutorial, visit:

<http://www.stylusstudio.com/videos/pipeline2/pipeline2.html>

The XML Pipeline is a visual data integration tool for designing, editing, debugging and deploying complete XML applications. This online video tutorial covers the design and deployment of a data integration application that aggregates information from various heterogeneous data sources including CSV and EDI, then publishes the result to both an HTML and PDF output format.

Sincerely,

The Stylus Studio Team
