Do you have any data in that range (row 17 to 65536)?

If you do, then this should have worked ok.

If you don't, you could add:

```
=if(count(f17:f9999)=0,"",originalformulahere)
```

This checks for a number in F17:F9999 (adjust the range if you need more rows).

but you could adjust the range to look in the formulas, too.

```
=LOOKUP(9.999999999999999E+307,Sheet1!F17:F9999)  
=INDEX(Sheet1!G17:G9999,MATCH(9.999999999999999E+307,Sheet1!F17:F9999))
```

But this adjustment won't help if you don't have data in there—you need something like the first (count()).
