After much bally ho this morning, this formual DID work this morning.

```
=COUNTIF([Floyd.xls]July # of Obs!C7:L7,"Care")+COUNTIF([Dunlap.xls]July  
# of Obs!C7:L7,"Care")
```

But then I saved the worksheet, opened it up an hour later and the file names now display the full network paths:

```
=COUNTIF("\\ntphg001v2\common_b\QA_Team_Specialists\Dale"s_Team_B_&_C\[Floyd.xls]July # of  
Obs!C7:L7,"Care")+COUNTIF("\\ntphg001v2\common_b\QA_Team_Specialists\Dale"s_Team_B_&_C\[Dunlap.xls]  
# of  
Obs!C7:L7,"Care")+COUNTIF("\\ntphg001v2\common_b\QA_Team_Specialists\Dale"s_Team_B_&_C\[Cooper.xls]  
# of Obs!C7:L7,"Care")
```

When I attempt to create the formual back to the original one listed above, I receive the #VALUE! error!
ARRGGHH!

Someone mentioned using NON Array formula, would that help out this issue?
