I have a column that contains 4 digit numbers

0001

0011

1111

etc.

what I need is a function that will add a zero to this number if the first digit is a zero and leave the rest alone

exp. if the first number in A1 is = to "0" (0001) the add a zero so the number is now (00001), if the first number is not a zero (1111) do nothing

thank you for any help!
