wad

Merged cells will allow "wrap text" from Format>Cells>Alignment but.....

Excel has a problem auto-fitting merged cells.

You can resize manually or via Macro. Jim Rech has written code for this.

<http://groups.google.com/groups?threadm=e1%241uzL1BHA.1784%40tkmsftngp05>

Note also a recent adaptation of this code by Greg Wilson.

<http://makeashorterlink.com/?P37D24B15>

The best cure is DON'T USE MERGED CELLS. They cause no end of problems with copying, pasting, sorting, filtering.
