- 

I am attempting to build...or reinvent the wheel, a scheduling spreadsheet in excel.

My parameters are

Employee Name

Date of the Month

Date of the Week

Days

Eve

Nights

I would like to be able to input a persons name and state are they avialable to work a particular day on a particular shift. I have been having no luck with filters or reports.

A B C D E

F

Name Date Dayoftheweek Day EVE

Night

Bill 22May Sun N Y

N

Mary 23May Mon Y N

N

I would like to have a report that would then filter out the day, the person, and the shift avialable.

Any thoughts?

Lonny
