

"file" cannot be accessed

"file" cannot be accessed

-

Today when I tried to access a file (stored on a jump drive) I have been using for several months to track my 401-K, I received the following message:

"file name' cannot be accessed. The file may be read-only, or you may be trying to access a read-only location. Or, the server the document is stored on may not be responding."

This is the only excel file on the jump drive which is not accessible. Any thoughts on how/if I can recover the information?

Thanks

.
