Spreadsheet/VBA Consulting – 50% Off or Even Free

External ASCII Files, Interact with Other Offices Applications (like Word, Outlook), Class Module, etc.

VB6/Access/Others: UDAQ Services also has experience with MS Access(Table, Form, Query, Reports, Stored Procedure, Macro, VBA, Database Application), VB6(ADO, DAO, Objects, API, ActiveX), Java, PHP, MySQL, Apache, HTML,C/C++, SPSS, Matlab, etc.

List of Recent Projects:

P001: Mortgage Transaction Spreadsheet Database

Developed a spreadsheet database application, which includes a user-friendly loan transaction entry interface, password protected administrative page to allow add/remove loan officer and loan manager, monthly and annual report for loan officers / managers, monthly state report, etc.

P002: Customer List Converted from Excel Table to Word

Developed an interface to convert a list of customers from an Excel table into a new Word document, one customer per page, including user-specified headers.

P003: Amortization Calculator

Developed an amortization calculator: based on user specified loan amount, interest rate, and term, calculate the monthly payment, total payment, total interest payment, payment schedule table, interest rate sensitivity charts, etc.

P004: Account Data Extraction from Internet

Developed a utility program to extract housing pricing/tax payment information from a government website based on a list of house address.

P005: Sales Invoice Database

Developed a spreadsheet database for sales invoicing. If user input an existing customer, then the shipping/billing address, VAT number, Account Number, etc. for that customer will be automatically filled into the invoice, otherwise, the new customer entry will be automatically added to the existing customer list database, automatically fill product information, calculate the invoice, create monthly and annual report for sales.

P006: Data Extraction from Hundreds of ASCII Files

Developed a spreadsheet application with user-friendly interface for importing data from hundreds for external ASCII files based on user-specified keywords.

P007: Mass Email based on Criteria

Developed a mass email program using Spreadsheet. Based on criteria (replied or not), send email (reminder) to each individual in the list with different body contents, different subject, and different salutation lines – about 1000 emails in the list.
