It might be able to be done, but you'd have to expand your details.

But excel has a nice built in way of choosing from a list.

You can use Data|Validation to choose from a list.

<http://www.contextures.com/xlDataVal01.html>

And if that list grows and contracts, you can use a dynamic range name.

<http://www.contextures.com/xlNames01.html#Dynamic>

Both of these are from Debra Dalglish's site.
